Last updated: October 3, 2026

Fields & Research Focus

Primary: Applied Econometrics; Agricultural Economics **Secondary:** Environmental and Resource Economics

I study how climate shocks, water scarcity, infrastructure, and policy incentives affect land-use decisions, agricultural outcomes, and environmental adaptation, using causal inference — difference-in-differences, instrumental variables, and double machine learning — combined with household survey, panel, and spatial data.

Education

- **Virginia Tech** *2023 – Expected Summer 2027*
  Ph.D. in Agricultural and Applied Economics USA
- **University of Greenwich** *2014 - 2015*
  MSc in Business and Financial Economics United Kingdom
- **The National Economics University** *2004 - 2008*
  Bachelor in Economics Vietnam

Job Market Paper

"Estimating impacts of climate stress on US milk production: a panel data with debiased machine learning approach"

Duong Ta (first author). *Current job market paper.*

This paper uses panel data and debiased machine learning to estimate the impacts of climate stress on U.S. milk production.

Work Experience

- **Virginia Tech [🌐]** *2023 – present*
  Graduate Research Assistant USA
- **The International Center for Tropical Agriculture (CIAT), Asia Hub [🌐]** *2018 – 2022*
  Research Assistant / Data Analyst (held concurrently with the VIE research post) Vietnam
  - Contributed to salinity-intrusion impact assessment in the Mekong Delta (2019–2022) and cassava production and value-chain research in Vietnam (2019–2021).
  - Developed questionnaires and programmed CSPro data-entry applications for two household surveys (rice farming under salinity; cassava production), each covering about 1,000 farm households.
  - As field supervisor, led roughly three-day trainings for teams of about 12 enumerators, supervised data collection, cleaned and analyzed the data, and contributed to co-authored research.
- **Vietnam Institute of Economics (VIE) [🌐]** *2010 – 2023*
  Researcher Vietnam
  - Led projects on the dynamics of farm and non-farm employment in Vietnam's rural economy (2022) and agricultural structure under climate change in the Mekong Delta (2021), from proposal development through analysis and final reports.
  - Contributed to research on household economic functions, labour productivity, structural transformation, agricultural value chains, and farm-firm linkages.

Teaching, Training & Mentoring Experience

- **Virginia Tech [🌐]** *2023 – present*
  Graduate Teaching Assistant USA
- **International Center for Tropical Agriculture (CIAT)** *2019 – 2022*
  Field Supervisor and Enumerator Trainer Vietnam
  - Led roughly three-day trainings for teams of about 12 enumerators on the questionnaire and CSPro data-entry application before each of two household surveys, then supervised fieldwork.

Professional Service & Affiliations

Affiliations: Agricultural and Applied Economics Association (AAEA).

Skills

- **Statistical & Econometric Software:** Stata, R, Python, Matlab, SQL, LaTeX
- **Geospatial & Remote Sensing:** Google Earth Engine
- **Machine Learning & Data Science:** Scikit-learn, TensorFlow, Keras
- **Reproducibility & Collaboration:** Git, GitHub, Quarto, VSCode
- **Research Methods:** Econometrics, Causal Inference, Microeconomic Methods, Cost-Benefit Analysis, Machine Learning, Survey Design, Experimental Design, Data Management, Data Visualization
- **Additional Training:** Machine Learning Specialization, Stanford University via Coursera (3 courses), 2025

Languages

Vietnamese (native), English (fluent).
